I. How to Create a New Account

1. Click the hyperlink that says “Click here” at the bottom of the page.

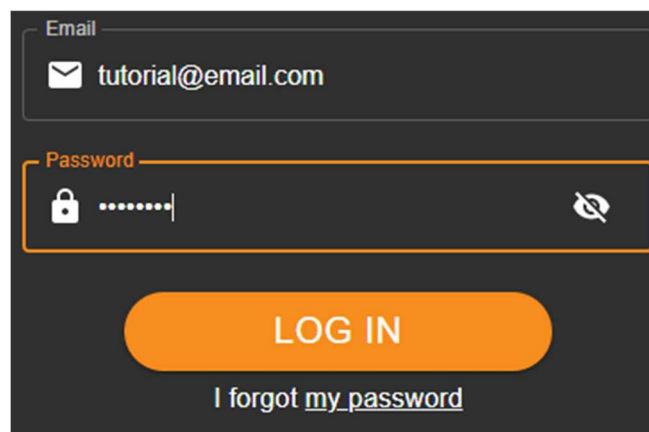

Don't have a Lorelines account? [Click here](#)

2. Fill in the text fields with your information. Make sure you remember the answer to your security question, as this is how you will be able to change your password.

The screenshot shows a dark-themed form titled "Create a new Lorelines account". It contains several input fields: "Name" (filled with "Tutorial"), "Email" (filled with "tutorial@email.com"), "Confirm Email" (filled with "tutorial@email.com"), "Password" (masked with dots), "Confirm Password" (masked with dots), "Security Question" (a dropdown menu showing "What school did you attend during the sixth grade?"), and "Security Question Answer" (masked with dots). Below the fields is a reCAPTCHA widget with a green checkmark and the text "I'm not a robot". At the bottom of the form is a large orange "SUBMIT" button and a "Go back" link.

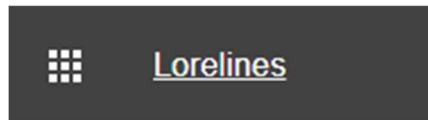

3. Click submit, and the page will prompt you to return to the login page.
4. Using the account you created, log in to lorelines.com!

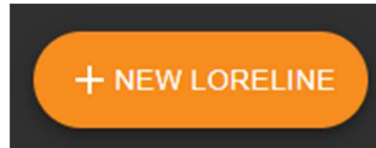

The screenshot shows a dark-themed login form. It has two main input fields: "Email" (filled with "tutorial@email.com") and "Password" (masked with dots). Below the password field is a large orange "LOG IN" button. At the bottom of the form is a link that says "I forgot my password".

II. How to Create a New Loreline

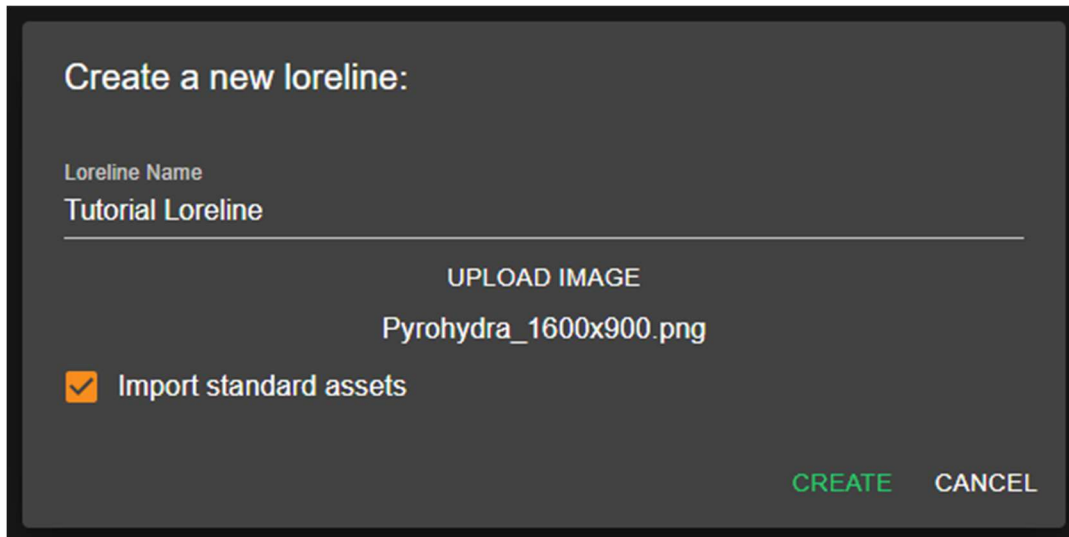

1. Click on the lorelines tile on the left-hand sidebar. In the condensed view it will be a square made of nine smaller squares, and in the extended view it will say “Lorelines”.

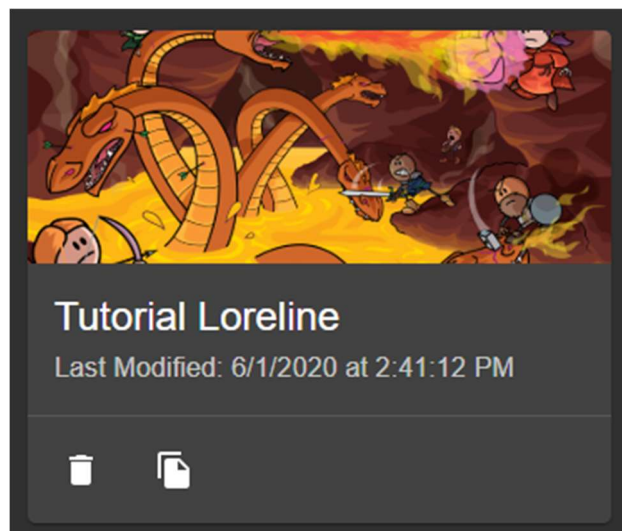

2. In the bottom right of the page, click the button that says “NEW LORELINE”

3. In the window that opens, give your Loreline a name, and upload a image if you want to. As our app stands now, you cannot change this later, so choose wisely.

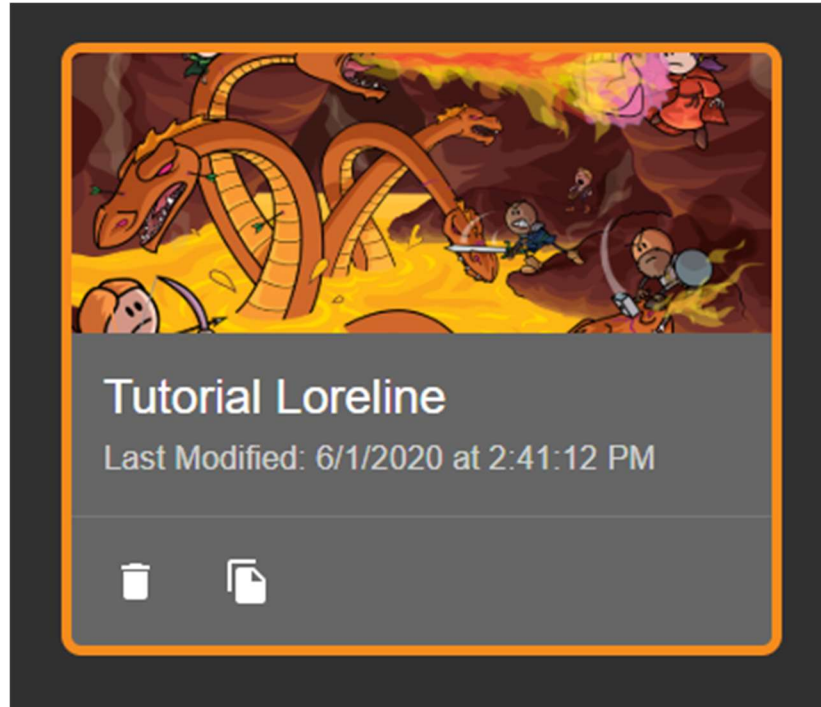

A dark gray dialog box titled "Create a new loreline:". It contains a text input field labeled "Loreline Name" with the text "Tutorial Loreline" entered. Below the input field is a horizontal line. Underneath the line is the text "UPLOAD IMAGE" and "Pyrohydra_1600x900.png". At the bottom left is a checked checkbox labeled "Import standard assets". At the bottom right are two buttons: "CREATE" in green and "CANCEL" in white.

4. Click create, and you should see your loreline in the loreline tab!

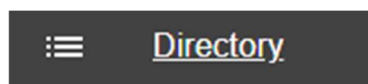

III. How to Create a New Custom Entity

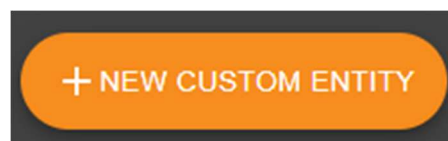

1. Now that you have a Loreline, you'll be able to create custom entities for it. To do so, make sure that the loreline you want to add a custom entity to is selected in the loreline tab. You can tell which loreline is selected by the orange border around it.

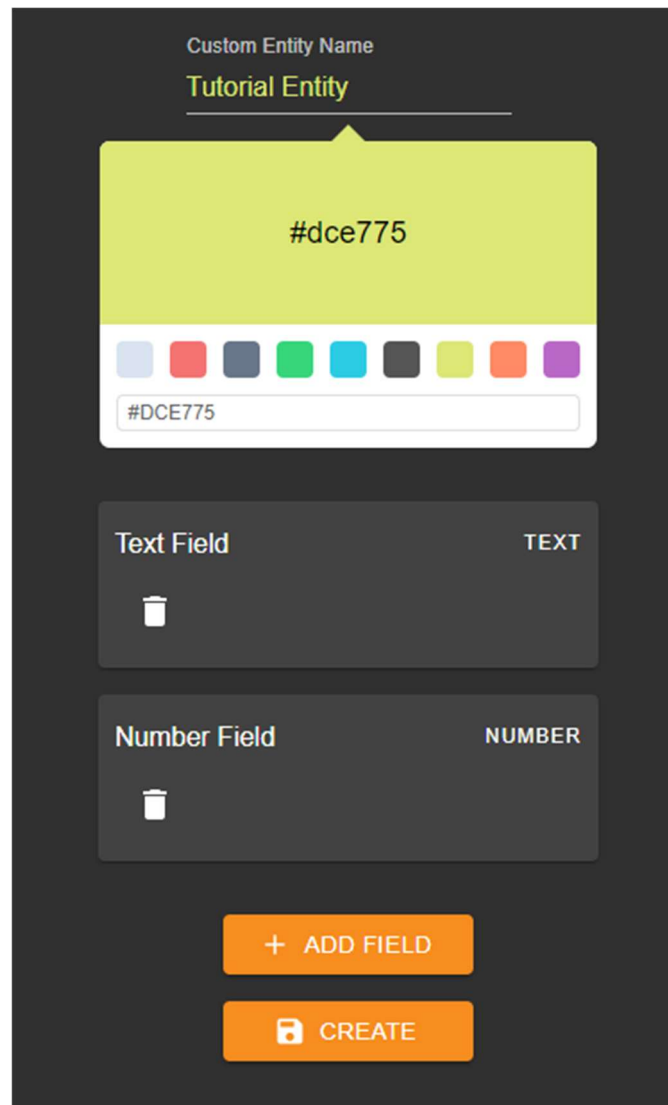

2. Once this is done, click on the directory tile on the left-hand sidebar. In the condensed view, it will look like a series of dots and lines. In the extended view, it will say "Directory".

3. Click the "NEW CUSTOM ENTITY" button in the bottom right.

4. The only thing you need to create a custom entity is a name. Other than that, you can create as many fields as you want. These fields can be used for storing all kinds of information, so feel free to get creative with their uses.

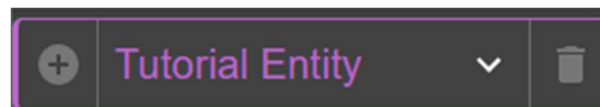

The screenshot shows a dark-themed interface for creating a custom entity. At the top, it says "Custom Entity Name" followed by "Tutorial Entity" in a yellow font. Below this is a yellow rectangular field containing the hex code "#dce775". Underneath the field is a row of nine colored squares (light blue, red, dark blue, green, cyan, black, yellow, orange, purple) and a text input field containing "#DCE775". Below these are two dark gray boxes: "Text Field" with a "TEXT" label and a trash icon, and "Number Field" with a "NUMBER" label and a trash icon. At the bottom are two orange buttons: "+ ADD FIELD" and "CREATE".

5. Once you've done this, click create, and you've got your first custom entity!

IV. How to Create an Instance of a Custom Entity

1. Now that you've got a custom entity, you can create an instance for it. Click the plus sign to the left of the custom entity name on the right-hand sidebar.

2. Each instance of an entity needs a name to separate it from the other instances of the same entity. Then, you must have entries for each of the fields you've created for your entity.

NEW INSTANCE OF:

TUTORIAL ENTITY

Instance Name
Tutorial Instance

Text Field
Text Content

Number Field
123

This is a sample form.

 CREATE

3. Once this is done, all you need to do is click create, and you'll have your first instance!
